SYSTEMS

## CLEAN WASTEWATER WITHOUT A PROBLEM

Wastewater treatment plants of NIQO systems® excel because of a high operational reliability and durability. They offer the highest adaptability for any situation.

Many plants, under different circumstances, have proven for years: treatment plants of NIQO systems® function; year in and year out, without any doubts. Treatment plants of NIQO systems® can handle any situation.

Robust polyethylene tank with shallow mounting depth and without "pop up" risk

Easily detachable airlift-module

Modern user friendly control system with IQ

Clean water through high quality purification

Reactor with durable aerator for fine bubble aeration

# NIQO

## SYSTEMS

THE BRAND FOR ROBUST AND INNOVATIVE SYSTEMS  
FOR YOUR WASTEWATER TREATMENT

### NIQO COMPACT

NIQO is operationally pre-assembled. The compact tank, made of certified high quality polyethylene, guarantees the highest durability and stability. NIQO is subjected to the most severe trials and in multiple tests the polyethylene tank stands out as the best. The robust shape and wall thickness of NIQO compact provides reliability for decades. NIQO compact is fully compliant, tested and approved to EN 12566-3 and is CE marked to meet the latest construction products regulations.

#### Minimal impact and high durability

With its compact dimensions, the low tank is placed quickly and easily, causing minimal damage to the garden. Because of its unique design, there are no vulnerable components in contact with wastewater, this extends life cycle and makes maintenance easy. This means lower operating costs for you!

#### NIQO control thinks!

- Modern control for outstanding operation
- Easy to use
- Tablet readout functions
- Allows manual operation
- Automatically detects workload
- Selects adequate aeration depending on the offer of wastewater
- Reduces operating time to a minimum during a constant underload
- Automatically activates holiday mode

NIQO control provides a power-saving mode, which optimises your operating costs!  
NIQO control is also suitable for systems of other manufacturers.

### SUSTAINABLE TREATMENT PLANTS

Treatment plants of NIQO Systems® have a longer life cycle and lower power consumption than other small sewage treatment plants. Once a NIQO treatment plant reaches the end of its life cycle, all of its components will be suitable for reuse. With NIQO Systems® you invest in quality and durability!

#### Highlights from the study reports:

“the components built in to the system are extremely robust.”

“NIQO systems® performed without malfunctions during the entire testing period.”

“NIQO systems® respond magnificently well to any changing circumstance.”

#### The final conclusion of the research report states:

“NIQO is ideal for use as a compact treatment plant with nitrogen elimination”

**NO “POP UP” RISKS  
IN HIGH LEVEL  
GROUNDWATER AREAS**

**JUST ONE COVER**

**PLUG & PLAY  
PRINCIPLE**

**CONTROL BOX WITH  
HIGH DEGREE OF  
PROTECTION**

**PURE WATER!**
